

Tri-Tech Skills Center Getting Ahead in a Career in Cyber Security

The Tri-Cities' Tri-Tech Skills Center now offers a Computer Science/Cyber Security program that coordinates with Columbia Basin College's Cyber Security program.

Curricula for the new program was developed in association with input from the local Computer Technology Advisory Committee, which consists of IT Professionals from companies both small and large, as well as major technology employers such as the Department of Energy and Pacific Northwest National Labs.

Tri-Tech Students who successfully complete this program earn credentials beginning with entry-level IT certifications and preparation for advancement up through a Bachelor's Degree of Applied Science at Columbia Basin College.
