

A Life Changing Idea

Kennewick's Tri-Tech Skills Center students had no idea what would happen when they entered the Verizon Innovative App Challenge at the suggestion of their Health Informatics teacher...

The Verizon App Challenge is designed to help students solve problems by creating an app to address an issue. **They created an app called Safe & Sound, By Teens 4 Teens** to help teens cope with stress and depression — **and it won the competition's Best in the Nation award!** That earned them an invitation to last Spring's White House Science Fair and the ability to demonstrate their app for White House Officials, the CEO of Google and Bill Nye the Science Guy.
